Course Name : Tools & Technologies for Internet Programming

Course Code :CSE-3532

Project Name:

The museum Of World Archaeology

Prepared By:

Adita Mutsuddi,C241432

Afia Tasnim Anisa,C241446

Warisa Ahmed,C241449

Submitted To:

Jannat Hossain Disha

Adjunct Lecturer

Dept. of CSE

Introduction to the Museum

- **Brief Introduction:**

The **Museum of World Archaeology** is an interactive online museum. It shows and preserves the history, artifacts, and discoveries of four major regions: **Africa, Asia, Europe, and America.**

- **Background Of The Project:**

Many great civilizations existed in the past. They left behind amazing **buildings, artifacts, and cultural history**, But many people cannot visit museums or access historical information easily because of **distance, cost** or **limited access**.

- **Importance Of The Project & Solution:**

This project brings important archaeological discoveries into one online platform, making history free and easy for everyone to learn. We are creating an interactive online museum where people can explore artifacts and ancient history from different regions in one place.

Problem Statement

- 01 Archaeological history is difficult for the public to access.
- 02 Museums and academic resources are not always easily available.
- 03 Geographical barriers make visiting museums difficult..
- 04 There is no single easy platform to explore world archaeology. he project makes historical knowledge easy to access online.

OBJECTIVES

A Main Objectives

To create an interactive virtual museum for preserving and presenting archaeological history.

B Specific Objectives

Preserve and present archaeological knowledge.
Create an immersive virtual museum experience.
Promote historical awareness.
Connect education with technology.

C Expected Outcome

Make ancient history easy and fun to explore.
Provide access to archaeological information online.
Make digital history accessible to everyone.

Proposed System

Advantages:

01. Easy and free access to history.
02. Interactive and user-friendly.
03. Accessible from phones, tablets, and computers.

Problems & Solutions

TARGET USERS

A Admin

1. Manages the overall system like users, artifacts, civilizations, orders, reviews , suggestions etc.
2. Adds ,updates, edit, deletes these admin contents.
3. Controls role based access permissions.

B Regular Visitors

1. Register and Login.
2. Browse museum galleries, exhibitions, civilizations, and gather
3. Experience with sharing their reviews & suggestions
4. Can check their General Knowledge by interactive Puzzle Match.

System Features

- i. Authentication Module
- ii. User Management Module
- iii. Museum Exhibition Module (Core)
- iv. Admin Dashboard
- v. Database Management
- vi. UI/UX Module
- vii. Reviews, Comments and Feedback Module

Technology Stack

Frontend	React, Vite, Tailwind CSS, JavaScript, Custom fonts
Backend	Node.js, Express.js
Database	MongoDB
Authentication	JWT
Other Tools	GitHub, VS Code, React Router, WebGL/ Three.js

The image displays a digital timeline interface for American history. At the top, the title 'AMERICAN HISTORY TIMELINE' is prominently displayed in a large, serif font, with 'HISTORICAL JOURNEY' in a smaller font above it. The current section is titled 'PALEOINDIAN ERA' and 'FIRST AMERICANS ARRIVE', dated '-12,000 BCE'. A descriptive paragraph explains that hunter-gatherers crossed the Bering land bridge and spread southward. Below the text, there are three arched windows showing museum exhibits: a long hall with a large mural, a mammoth skeleton, and a wall of indigenous figures. Navigation controls include a left arrow, a right arrow, and a '1 OF 4' indicator.

Future Scopes

- Add more civilizations and archaeological sites.
- Develop a mobile application for offline access.
- Add AI features for better learning and exploration.
- Improve website security.
- Expand Bengali content for more users.
- Add a virtual guided tour feature.
- Improve the user experience.

CONCLUSION

- ❖ The project creates an interactive online museum for world archaeology.

- ❖ It solves the problem of limited access to archaeological history.
-

- ❖ It provides a **single online platform** to explore artifacts and ancient civilizations.

- ❖ The project creates an interactive online museum for world archaeology.
